# tuitionbreak

for new england residents

## How to be eligible

A resident of a New England state is eligible when enrolled in an approved degree program offered by a public college or university in another New England state. Approved programs are listed on our website.

## Pay lower tuition

Students pay a tuition rate that is much lower than the regular out-of-state tuition. The average annual savings for a full-time student is \$8,500. The savings and tuition rates vary by institution. Tuition rates and savings for the participating colleges and universities are updated annually on our website.

## How to apply

To apply, students complete the admissions application for the college that offers a program through Tuition Break, and declare that program as their intended major. Eligibility is confirmed by the college following acceptance for admission. Tuition Break does not require a separate application to receive the discounted tuition.

### Use the website to:

- check your eligibility
- find participating colleges & universities
- search for academic programs

## Hundreds of programs

You can receive the Tuition Break discount for certificates, associate, bachelor's, graduate and professional degree programs- in all areas of study.

Over half of the institutions that participate in Tuition Break are fully flexible. This allows the institutions to give the discount to all New England residents, regardless of enrolled program.

The programs are pre-approved on an annual basis and updated lists are published on our website. The participating colleges and universities decide which programs are eligible.
